Measures of Schools and Students in Gorham
May 2023

Inequitable education funding in New Hampshire affects far more than the property taxpayer. Students’ educational experiences can be drastically different all over the state. Below is some helpful information about the schools in Gorham and how they compare to the rest of the state.

Students and Student Characteristics

Gorham-Randolph-Shelburne School District has grades from kindergarten through 12th grade between Edward Fenn Elementary School, Gorham Middle School, and Gorham High School. Table 1 shows enrollment in October 2023 by grade.

358 of the 393 students in 2021 were white non-Hispanic.

In the 2021-22 school year, there were 393 public school students in Gorham. Of these, 80 were eligible for free/reduced-price school meals, meaning their family’s income was below 185% of the Federal Poverty Line. This was 20% of the students, less than the statewide average of 23%.

Also in the 2021-22 school year, 75 students were receiving special education services with an Individual Education Plan (IEP). This was 19% of the students, the same as the statewide average of 19%.

2 students were English language learners, less than 1% of all students. Statewide, 3% of students were English language learners in the 2021-22 school year.

G-R-S Cooperative overall has a lower percentage of students whose background would indicate a need for special services and their associated costs.
How Much Do Teachers Earn in Gorham?

In 2007-08 there were 33 teachers. In 2021-22 there were 40 teachers.

In 2021-22 the average teacher salary in Gorham was $64,503. This was 3% above the state average of $62,695. Since 2010, Gorham’s average teacher salary has been above the state average, while it has been above that of White Mountains, and below that of Portsmouth since 2011.

Gorham’s average teacher salary increased by 22% from 2007-08. At the same time, the Consumer Price Index increased by 36%.

Average teacher salary is affected by two things: the actual salary schedule of a district and the number of years of teaching experience among the teachers. Teacher salary schedules generally increase salaries as teachers gain experience through years on the job. It is therefore possible for two districts that have identical salary schedules to have different average salaries. The salary of a newly recruited teacher depends on the district’s salary schedule, not on the average teacher’s salary.

Starting salaries, on the other hand, show us what a recent college graduate (with a bachelor’s degree) could earn as a first-time teacher in a district. This is important for hiring and retaining quality teachers over the long term. The starting salaries for teachers in New Hampshire ranged from $31,712 to $59,752 in the 2021-22 school year.
Gorham has a starting salary for its teachers of $38,400 for the 2021-2022 school year. Gorham’s starting salary for teachers is 5% lower than the state average of $40,478. In Figure 2 we can see that schools like Lebanon and the White Mountains have different starting salaries than Gorham.

What Sports Are Available to Gorham High School Students?

The New Hampshire Interscholastic Athletic Association (NHIAA) organizes high school sports competitions in New Hampshire. Of 34 NHIAA sports in 2019-20, Gorham offered 9 athletic programs for its 365 enrolled high school students. Of the high schools with enrollment under 400 students, the average number of sports was under 20. The number of interscholastic sports available to Gorham students at Gorham was below average for high schools of similar size.

The interscholastic sports offered at Gorham were:

- Boys and Girls Ice Hockey
- Boys & Girls Cross Country
- Boys Soccer
- Boys Basketball
- Girls Basketball
- Baseball
- Softball
- and Boys and Girls Alpine Skiing

The sports available in any particular year will depend, of course, on the availability of coaches and whether enough students sign up.

What is the High School Graduation Rate?

High schools that serve students from multiple elementary school districts or towns report graduates and graduation rates in total, not separately for each town. Gorham’s graduating classes include students from Gorham, Shelburne, Errol, Dummer, Milan, and Randolph. The data that follows is for all students at Gorham High.

Gorham graduated 230 students in graduating classes from 2015 through 2021. The graduation rate over those 7 years averaged 95.4%. This was above the state average of 88.9% over the same years.

Of course, the rate varied somewhat from year to year as shown in Figure 3.
Ranking the 81 New Hampshire public high schools’ graduation rates over this period from highest rate (1) to lowest rate (81), Gorham ranks 10th.

How Well Do High School Students Do on the Annual SAT Exam?

One of the standardized exams used by New Hampshire to measure student achievement in high school is the SAT of the College Board. There are two parts: Mathematics and Evidence-Based Reading and Writing. The possible range of combined scores is 400 to 1600.

Over the four years from 2018 through 2021, 115 students at Gorham took the SAT exams in the spring of their junior year. The average score of those students was 1036 while the New Hampshire average was 1038. Of the 79 public high schools for which data was available, Gorham ranked 29th (rank #1 being the highest average score and rank #79 being the lowest average score).¹

The total October enrollment over 4 years of the junior year totaled 132. As a percentage of enrollment, 12.9% were not tested. The percentage of untested students statewide was 12.2%. Thus, Gorham was able to test about the same percentage of its juniors as the average.

What Courses are Available to Students in Gorham?

Course availability is an important measure of a student’s educational opportunity. Based on Course of Studies collected from NH Public High Schools from the 2021-22 school year, course offerings were compiled, as well as the state average of nine-course categories ranging from Math to Arts. Table 4 shows that Gorham falls below the state average in all categories except for English elective courses.

The availability of courses is tied to several factors. The size of a school plays a large role in what a school can offer as well as staffing, transportation, and licensure. Gorham has 136 students, while the average high school size in NH is 692.

¹ Scores are not available for Bud Carlson Academy in Rochester and Pittsburg High School because the number of test takers in any particular year was fewer than 5.

Advanced Placement Results in Gorham

In the four years from 2018 to 2021, there were 22,966 AP exam takers and 36,355 exams taken in New Hampshire. As a percentage of enrollment, 10.6% of students took AP exams. During that time, Gorham had 59 test takers and 69 exams taken. 39 of those exams scored high enough to earn credit at some colleges.

Gorham offered 8 AP courses for the 2021-2022 academic year. Table 5 compares Gorham to the state’s averages for test takers as a percentage of enrollment, the percentage of exams that scored a 3, 4, or 5, and the number of students who scored a 3 or higher out of 100 students. Gorham fell above the state averages for test takers as a percentage of enrollment.

How Likely Are Students from Gorham to Apply, Earn Admittance, and Enroll at The University of New Hampshire?

The University of New Hampshire (UNH) is one of New Hampshire’s public higher education institutions. The school is often a popular choice for many NH students graduating from public high schools. Though not the only choice, analyzing the application, admission, and enrollment patterns among New Hampshire High Schools can tell us interesting things about the post-secondary paths of students.

Based on data collected by the University of New Hampshire, counts of applications, admissions, and enrollments over 5 years between 2017-2021 were available for analysis. Using the senior enrollments as of October 1st at NH public high schools over 5 years helps protect the identity of students at small schools and helps build a better sample.
On average, based on the years 2017-2021, 27% of New Hampshire’s public school senior class applied to the UNH. Of those students who applied, 83.8% of them were admitted to the University of New Hampshire. Though, on average only 7.4% of all seniors ended up enrolling and attending UNH.

Gorham was below the state average in terms of UNH applications, admissions, and enrollments. Over the 5 years, Gorham had 36.5% of their seniors apply to UNH. Of those applicants, 81% were admitted and only 6.9% of their seniors enrolled and attended UNH.

As seen throughout this paper, educational experiences for New Hampshire students vary widely across the state. A school’s finances can make a large impact on the student population in their post-secondary lives.

*Note:* Data used in this report are taken from reports and spreadsheets of the NH Department of Education, The University of New Hampshire, and the College Board (2022 Adequacy Summary, School Sports, Average Daily Membership Based Upon Attendance and Residence (ADM), Average Class Size by School, and DoE25 Extract for State Profile Data for various years, Teacher Salaries, SAT scores, and graduation rates). Such data are reported by New Hampshire school districts to the Department. The number of courses offered was hand collected from Programs of Study from 79 New Hampshire Public High Schools.
